| Kategorie                | Antikörper                                                                                                                                                                                                                                                                              |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                                                   |
| Immunogen                | Immunogen was a synthetic peptide derived from human Tau. This antibody was produced from a hybridoma resulting from the fusion of a mouse myeloma with B cells derived from the immunized mouse. The IgM fraction of cell culture supernatant was purified by affinity chromatography. |
| Produktbeschreibung      | Rabbit anti-Bim Antibody...                                                                                                                                                                                                                                                             |
