| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | Recombinant human full-length MS4A1 protein                                                                                                                                                                                                                   |
| Produktbeschreibung      | Recognizes a protein of 30-33kDa, which is identified as CD20. It is a non-Ig differentiation antigen of B-cells and its expression is restricted to normal and neoplastic B-cells, being absent from all other leukocytes and tissues. CD20 is expressed ... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [MSVA-020R]                                                                                                                                                                                                                                                   |
| Molekulargewicht         | 33-37kDa                                                                                                                                                                                                                                                      |
