### Metreleptin, Recombinant Leptin CRM-THP-0134

Artikelname	Metreleptin, Recombinant Leptin
Artikelnummer	CRM-THP-0134
Hersteller Artikelnummer	THP-0134
Alternativnummer	CRM-THP-0134-1
Hersteller	Creative BioMart
Kategorie	Proteine/Peptide
Anwendungsbeschreibung	<p>Koate (antihemophilic factor) -DVI is indicated for the treatment of classical hemophilia (hemophilia A) in which there is a demonstrated deficiency of activity of the plasma clotting factor, factor VIII. Koate (antihemophilic factor) -DVI provides a means of temporarily replacing the missing clotting factor in order to control or prevent bleeding episodes, or in order to perform emergency and elective surgery on individuals with hemophilia. Koate (antihemophilic factor) -DVI contains naturally occurring von Willebrands factor, which is co-purified as part of the manufacturing process. Koate (antihemophilic factor) -DVI has not been investigated for efficacy in the treatment of von Willebrands disease, and hence is not approved for such usage.</p>
