Anwendungsbeschreibung	May be administered in cases of uncontrolled bleeding. Factor VII alone can be used in the treatment of congenital hemophilia A or B, acquired hemophilia, congenital factor VII deficiency, and Glanzmanns thrombasthenia. Off label use in the treatment of refractory bleeding after cardiac surgery and warfarin related intracerebral hemorrhage. Brands for human factor VII are currently only in combination with other vitamin K coagulation factors and can be used to reverse vitamin K antagonist activity in patients with acute major bleeds or for urgent surgery/invasive procedures.
