| Konjugation              | Unconjugated                                                                                                                                                                                                                                                   |
| Produktbeschreibung      | Deltalike protein 3 (DLL3) is a transmembrane protein that belongs to the Delta/Serrate/Lag2 (DSL) family of Notch ligands. May be required to divert neurons along a specific differentiation pathway. Plays a role in the formation of somite boundaries ... |
| Molekulargewicht         | 34.4 kDa                                                                                                                                                                                                                                                       |
| Tag                      | C-10*His                                                                                                                                                                                                                                                       |
| NCBI                     | <a href="#">9</a>                                                                                                                                                                                                                                              |
| Puffer                   | PBS, pH7.4                                                                                                                                                                                                                                                     |
| Reinheit                 | 95%                                                                                                                                                                                                                                                            |
