| Produktbeschreibung      | B71 and B72, together with their receptors CD28 and CTLA4, constitute one of the dominant costimulatory pathways that regulate T and Bcell responses. Although both CTLA4 and CD28 can bind to the same ligands, CTLA4 binds to B71 and B72 with a 20 100... |
| Molekulargewicht         | 25.8 kDa                                                                                                                                                                                                                                                     |
