| Produktbeschreibung      | Interleukin22 receptor subunit alpha1(IL22RA1) is a component of the receptor for IL20, IL22 and IL24.Component of IL22 receptor formed by IL22RA1 and IL10RB enabling IL22 signaling via JAK/STAT pathways. IL22 also induces activation of MAPK1/MAPK3 a... |
| Molekulargewicht         | 50.6 kDa & 49.7 kDa                                                                                                                                                                                                                                           |
| Tag                      | C-Fc   C-Fc                                                                                                                                                                                                                                                   |
| NCBI                     | 8                                                                                                                                                                                                                                                             |
| Puffer                   | PBS, pH7.4                                                                                                                                                                                                                                                    |
