| Produktbeschreibung      | The Sortilin is a sorting receptor in the Golgi compartment and as a clearance receptor on the cell surface. Required for protein transport from the Golgi apparatus to the lysosomes by a pathway that is independent of the mannose6phosphate receptor (...) |
| Molekulargewicht         | 77.6 kDa                                                                                                                                                                                                                                                       |
| Tag                      | C-10*His                                                                                                                                                                                                                                                       |
