| Konjugation              | FITC                                                                                                                                                                                                                                                          |
| Produktbeschreibung      | The 17A2 antibody reacts with the mouse CD3 complex, comprised of CD3 epsilon, CD3 gamma and CD3 delta. These integral membrane protein chains assemble with additional chains of the T cell receptor (TCR), as well as CD3 zeta chain, to form the T cell... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 0.5 mg/ml (Please refer to the vial label for the specific concentration.)                                                                                                                                                                                    |
| Klon-Bezeichnung         | [17A2]                                                                                                                                                                                                                                                        |
| Isotyp                   | IgG2b                                                                                                                                                                                                                                                         |

|                        |                                                                                                             |
