| Spezies Reaktivität      | Plant                                                                                                                                                                                                                                                         |
| Konjugation              | FITC                                                                                                                                                                                                                                                          |
| Produktbeschreibung      | The anti-H (O) hemagglutinating activity of Ulex europaeus has been used widely to confirm blood group O activity. UEA I binds to many glycoproteins and glycolipids containing alpha -linked fucose residue. The purified lectin appears to be a dimer of... |
| Konzentration            | 1 mg/ml (Please refer to the vial label for the specific concentration.)                                                                                                                                                                                      |
| Sensitivitaet            | Fucose blood group H                                                                                                                                                                                                                                          |
| Puffer                   | 10mM Phosphate, 150mM NaCl, 0.1mM CaCl <sub>2</sub> , 0.05% Sodium azide.                                                                                                                                                                                     |
| Expression System        | Native Protein                                                                                                                                                                                                                                                |
| Formulierung             | Liquid                                                                                                                                                                                                                                                        |
