| Immunogen                | Gln21-Ala757                                                                                                                                                                                                                                        |
| Produktbeschreibung      | Recombinant Human Thrombospondin-5/COMP Protein is produced by HEK293 cells expression system. The target protein is expressed with sequence (Gln 21 - Ala 757 ) of human COMP (Accession NP_000086.2) fused with a 6*His tag at the C-terminus.... |
| Konzentration            | < 0.1 EU/µg of the protein by LAL method.                                                                                                                                                                                                           |
| Molekulargewicht         | 81.80 kDa                                                                                                                                                                                                                                           |
| Tag                      | C-His                                                                                                                                                                                                                                               |
