| Produktbeschreibung      | Influenza A virus is a major public health threat. Novel influenza virus strains caused by genetic drift and viral recombination emerge periodically to which humans have little or no immunity, resulting in devastating pandemics. Influenza A can exist... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 1ug/ul                                                                                                                                                                                                                                                        |
| Puffer                   | Aqueous buffered solution containing 0.01M TBS (pH 7.4) with 1% BSA, 0.02% Proclin300 and 50% Glycerol.                                                                                                                                                       |
| Quelle                   | KLH conjugated synthetic peptide derived from Hemagglutinin/Influenza A virus (H5N1)                                                                                                                                                                          |

|                        |                                                                                |
