| Produktbeschreibung      | Leucine-rich repeats (LRRs) are 20-29 amino acid motifs that mediate protein-protein interactions. The primary function of these motifs is to provide a versatile structural framework for the formation of these protein-protein interactions. LRRs are p... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
