| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | IHC-P, WB                                                                                                                                                                                                                                                     |
| Spezies Reaktivität      | Human, Mouse, Rat                                                                                                                                                                                                                                             |
| Immunogen                | Amino acids IQDEGIFRCQAMNRNGKETKSNYRVRVYQI of human RAGE were used as the immunogen for the RAGE antibody.                                                                                                                                                    |
| Produktbeschreibung      | The receptor for advanced glycation end products (RAGE) is a multi-ligand member of the immunoglobulin superfamily of cell surface molecules. It interacts with distinct molecules implicated in homeostasis, development and inflammation, and certain di... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
| UniProt                  | <a href="#">Q15109</a>                                                                                                                                                                                                                                        |
| Puffer                   | Lyophilized from 1X PBS with 2.5% BSA and 0.025% sodium azide                                                                                                                                                                                                 |
| Reinheit                 | Antigen affinity                                                                                                                                                                                                                                              |

|                        |                                                                               |
|------------------------|-------------------------------------------------------------------------------|
| Formulierung           | 0.5mg/ml if reconstituted with 0.2ml sterile DI water                         |
| Antibody Type          | Primary Antibody                                                              |
| Application Verdünnung | Western blot: 0.1-0.5ug/ml,IHC (FFPE): 0.5-1ug/ml                             |
| Anwendungsbeschreibung | Optimal dilution of the RAGE antibody should be determined by the researcher. |
