| Hersteller               | NSJ Bioreagents                                                                                                                                                                                                                                               |
| Wirt                     | Mouse                                                                                                                                                                                                                                                         |
| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | ELISA, FACS, IF                                                                                                                                                                                                                                               |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | A recombinant human full length protein was used as the immunogen for the GNAQ antibody.                                                                                                                                                                      |
| Produktbeschreibung      | GNAQ is 359 amino acids long and is identical in all but 1 amino acid residue to the mouse protein. Analysis of human genomic DNA revealed an intronless sequence with strong homology to human GNAQ cDNA. In comparison to GNAQ cDNA, this genomic DNA se... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [GNAQ/2434]                                                                                                                                                                                                                                                   |
| UniProt                  | <a href="#">P50148</a>                                                                                                                                                                                                                                        |
| Reinheit                 | Protein G affinity chromatography                                                                                                                                                                                                                             |

|                        |                                                                                                                    |
|------------------------|--------------------------------------------------------------------------------------------------------------------|
| Formulierung           | 1 mg/ml in 1X PBS, BSA free, sodium azide free                                                                     |
| Antibody Type          | Primary Antibody                                                                                                   |
| Application Verdünnung | ELISA: order BSA-free format for coating,Flow cytometry: 1-2ug/million cells in 0.1ml,Immunofluorescence: 1-2ug/ml |
| Anwendungsbeschreibung | Optimal dilution of the GNAQ antibody should be determined by the researcher.                                      |
