| Spezies Reaktivität      | Human, Mouse, Rat                                                                                                                                                                                                                                             |
| Immunogen                | Recombinant human full-length HSP60 protein was used as the immunogen for the recombinant HSP60 antibody. Its epitope is localized between amino acids 383-447 of human hsp60.                                                                                |
| Produktbeschreibung      | Recognizes a 60kDa protein, identified as the heat shock protein 60 (hsp60). Its epitope is localized between aa 383-447 of human hsp60. A wide variety of environmental and pathophysiological stressful conditions trigger the synthesis of a family of ... |
