| Hersteller               | NSJ Bioreagents                                                                                                                                                                                                                                               |
| Wirt                     | Mouse                                                                                                                                                                                                                                                         |
| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | IHC-P, WB                                                                                                                                                                                                                                                     |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | A portion of amino acids 2-466 from the human protein was used as the immunogen for the recombinant VIM antibody.                                                                                                                                             |
| Produktbeschreibung      | Anti-vimentin alone is of limited value as a diagnostic tool, however, when used in panels with other antibodies, it is useful for the sub-classification of a given tumor. Expression of vimentin, when used in conjunction with anti-keratin, is helpful... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [rVIM/6431]                                                                                                                                                                                                                                                   |
| UniProt                  | <a href="#">P08670</a>                                                                                                                                                                                                                                        |

|                        |                                                                                          |
|------------------------|------------------------------------------------------------------------------------------|
| Reinheit               | Protein A/G affinity                                                                     |
| Formulierung           | 0.2 mg/ml in 1X PBS with 0.1 mg/ml BSA (US sourced), 0.05% sodium azide                  |
| Antibody Type          | Primary Antibody                                                                         |
| Application Verdünnung | Western blot: 1-2ug/ml,Immunohistochemistry (FFPE): 1-2ug/ml                             |
| Anwendungsbeschreibung | Optimal dilution of the recombinant VIM antibody should be determined by the researcher. |
