| Hersteller               | Aviva                                                                                                                                                                                                                                                         |
| Wirt                     | Rabbit                                                                                                                                                                                                                                                        |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                              |
| Applikation              | IHC, WB                                                                                                                                                                                                                                                       |
| Spezies Reaktivität      | Bovine, Canine, Equine, Guinea pig, Human, Mouse, Rabbit, Rat, Zebrafish                                                                                                                                                                                      |
| Immunogen                | The immunogen is a synthetic peptide directed towards the middle region of human GTF2F2                                                                                                                                                                       |
| Produktbeschreibung      | GTranscription Factor Antibodies2F2 is required for both basal and HIV-1 Tat-activated transcription. GTranscription Factor Antibodies2F2 synergizes with HIV-1 Tat and the cellular co-activator Tat-SF1 during Tat-mediated transactivation of the HIV-1... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 0.5 mg/ml                                                                                                                                                                                                                                                     |
| Molekulargewicht         | 28kDa                                                                                                                                                                                                                                                         |
| NCBI                     | <a href="#">2963</a>                                                                                                                                                                                                                                          |

|              |                                                                                                   |
