| Hersteller Artikelnummer | OABB01567                                                                                                                                                                                                                                                       |
| Alternativnummer         | ASB-OABB01567-100UG/VIAL                                                                                                                                                                                                                                        |
| Hersteller               | Aviva                                                                                                                                                                                                                                                           |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                                |
| Applikation              | ELISA, GICA, NeA                                                                                                                                                                                                                                                |
| Immunogen                | Recombinant Human Novel Coronavirus Spike glycoprotein (S) (16-685aa) (CSB-MP3324GMY)                                                                                                                                                                           |
| Konjugation              | Unconjugated                                                                                                                                                                                                                                                    |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                      |
| NCBI                     | <a href="#">43740568</a>                                                                                                                                                                                                                                        |
| UniProt                  | <a href="#">Q12906</a>                                                                                                                                                                                                                                          |
| Formulierung             | Liquid                                                                                                                                                                                                                                                          |
| Application Verdünnung   | Attaches the virion to the cell membrane by interacting with host receptor, initiating the infection. Binding to human ACE2 receptor and internalization of the virus into the endosomes of the host cell induces conformational changes in the Spike glycoprot |
