| Applikation              | WB                                                                                                                                                                                                                                                    |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                 |
| Immunogen                | The immunogen is a synthetic peptide directed towards the N terminal region of human OTUD6A                                                                                                                                                           |
| Produktbeschreibung      | Deubiquitinating enzymes (DUBs, see MIM 603478) are proteases that specifically cleave ubiquitin (MIM 191339) linkages, negating the action of ubiquitin ligases. DUBA2 belongs to a DUB subfamily characterized by an ovarian tumor (OTU) domain.... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                            |
| Konzentration            | 0.5 mg/ml                                                                                                                                                                                                                                             |
| Molekulargewicht         | 32kDa                                                                                                                                                                                                                                                 |
