| Artikelname              | DyLight 405, Goat Anti-Rabbit IgG, Polyclonal                                                               |
| Artikelnummer            | ASC-A23120                                                                                                  |
| Hersteller Artikelnummer | A23120                                                                                                      |
| Alternativnummer         | ASC-A23120-100, ASC-A23120-500                                                                              |
| Hersteller               | Abbkine Scientific                                                                                          |
| Wirt                     | Goat                                                                                                        |
| Kategorie                | Antikörper                                                                                                  |
| Applikation              | FC, ICC, IF                                                                                                 |
| Spezies Reaktivität      | Rabbit                                                                                                      |
| Immunogen                | Rabbit IgG whole molecule                                                                                   |
| Konjugation              | DyLight 405                                                                                                 |
| Produktbeschreibung      | DyLight 405 conjugated Goat Anti-Rabbit IgG (H+L) secondary antibody...                                     |
| Klonalität               | Polyclonal                                                                                                  |
| Tag                      | Goat Anti-Rabbit IgG                                                                                        |
| Puffer                   | Liquid in PBS, pH 7.4, containing 0.02% Sodium Azide as preservative, 1% BSA as stablizer and 50% Glycerol. |
| Reinheit                 | Affinity purified using solid phase Rabbit IgG (H&L) with finally > 95% purity based on SDS-PAGE            |

|                        |                                                                                                                                                                |
|------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Formulierung           | Liquid solution                                                                                                                                                |
| Anwendungsbeschreibung | Optimal working dilutions should be determined experimentally by the investigator. Suggested starting 1:50-1:1000 dilutions for most fluorescent applications. |
