| Hersteller               | Abbkine Scientific                                                                                                                                                                                                                                            |
| Kategorie                | Kits/Assays                                                                                                                                                                                                                                                   |
| Produktbeschreibung      | The main material of this technology is the Transwell chamber, and Abbkine Cell Migration Assay Kit (24-Well Plate, 8 µm) uses a polycarbonate membrane (8 µm pore size) to measure the migration characteristics of cells. The principle is to put the Tr... |
| Tag                      | Cell Migration                                                                                                                                                                                                                                                |
| Anwendungsbeschreibung   | Cell Migration Assay Kit (24 well,8µM) is used to detect cell migration with relative accuracy.                                                                                                                                                               |
