Product Datasheet

ISRIB, CAS [[1597403-47-8]] FBM-10-1539

Artikelname	ISRIB, CAS [[1597403-47-8]]
Artikelnummer	FBM-10-1539
Hersteller Artikelnummer	10-1539
Alternativnummer	FBM-10-1539-5MG,FBM-10-1539-25MG
Hersteller	Focus Biomolecules
Kategorie	Biochemikalien
Produktbeschreibung	Integrated stress response inhibitor...
Molekulargewicht	451.34
Reinheit	98% by TLC, NMR (Conforms)
Formulierung	White solid
CAS Nummer	[1597403-47-8]
Formel	C22H24Cl2N2O4
Anwendungsbeschreibung	Integrated stress response inhibitor. Potently reverses the effects of initiation factor 2alpha (eIF2alpha) phosphorylation, IC50=5 nM.1 Enhances spatial and fear-associated learning in mice and enhances cognitive function.1,2 Mechanism of action involves activation of eiF2beta.3 Suppresses ER stress-induced inflammatory gene expression.4 Potently attenuates amyloid beta-induced neuronal cell death (12.5-25 nM) with no effect on amyloid beta production.5 Reverses hippocampal-dependent cognitive deficits induced by traumatic brain injury in two different injury mouse models.6
