Product Datasheet

Bosutinib, CAS [[380843-75-4]] FBM-10-2122

Artikelname	Bosutinib, CAS [[380843-75-4]]
Artikelnummer	FBM-10-2122
Hersteller Artikelnummer	10-2122
Alternativnummer	FBM-10-2122-5MG,FBM-10-2122-25MG
Hersteller	Focus Biomolecules
Kategorie	Biochemikalien
Produktbeschreibung	Dual Src/Abl kinase inhibitor...
Molekulargewicht	530.45
Reinheit	>98% by HPLC, NMR (Conforms)
Formulierung	Off-white solid
CAS Nummer	[380843-75-4]
Formel	C ₂₆ H ₂₉ Cl ₂ N ₅ O ₃
Anwendungsbeschreibung	An ATP-competitive dual Src/Abl kinase inhibitor (IC ₅₀ = 1 nM). ¹ It potently inhibits the apoptosis-linked STE20 kinases but does not inhibit Kit or PDGFR. ² Bosutinib was found to inhibit 16 of 18 imatinib-resistant mutant forms of Bcr-Abl expressed in murine myeloid cell lines, but did not inhibit T315I and V299L mutants. ³ Enhances retinoic acid-induced differentiation of HL-60 leukemia cells. ⁴ Suppresses migration and invasion of human breast cancer cells (IC ₅₀ = 250 nM which is also the IC ₅₀ for inhibition of cellular Src kinase activity in intact tumor cells). ⁵
