Product Datasheet

CPI-455, CAS [[1628208-23-0]] FBM-10-4035

Artikelname	CPI-455, CAS [[1628208-23-0]]
Artikelnummer	FBM-10-4035
Hersteller Artikelnummer	10-4035
Alternativnummer	FBM-10-4035-5MG,FBM-10-4035-25MG
Hersteller	Focus Biomolecules
Kategorie	Biochemikalien
Produktbeschreibung	Lysine demethylase KDM5 inhibitor...
Molekulargewicht	278.32
Reinheit	98% by HPLC NMR (conforms)
Formulierung	Off-white solid
CAS Nummer	[1628208-23-0]
Formel	C16H14N4O
Anwendungsbeschreibung	CPI-455 (1628208-23-0) is a potent (IC ₅₀ = 10 nM) and selective inhibitor of the lysine demethylase KDM5 (equal inhibition of KDM5A, 5B, 5C). ¹ CPI-455 reduced the number of drug-tolerant persister cancer cells (DTPs) in a dose-dependent, KDM5-dependent manner in multiple cell lines treated with standard chemotherapy or targeted agents. CPI-455 synergized with 5-aza-2-deoxycytidine (DAC) to reduce the viability of luminal breast cancer cells in vitro. ² KDM5 demethylases have recently been shown to repress the immune response to tumors via suppression of STING. ³
