| Immunogen                | Ectodomain of recombinant human 4-1BB fusion protein                                                                                                                                                                                                          |
| Produktbeschreibung      | CD137 is a 39 kD transmembrane protein also known as 4-1BB. It is expressed on activated T cells. CD137 is a type I membrane protein and a member of the tumor necrosis factor receptor superfamily. CD137 appears to be important for T cell proliferatio... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [3H491 4B4-1]                                                                                                                                                                                                                                                 |
| Reinheit                 | Purified by affinity chromatography.                                                                                                                                                                                                                          |
| Formulierung             | Supplied as a liquid in PBS, pH 7.2, BSA, 0.09% sodium azide. Labeled with R-Phycoerythrin (PE).                                                                                                                                                              |
