| Hersteller               | US Biological                                                                                                                                                                                                                                                                           |
| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                                                       |
| Applikation              | ELISA                                                                                                                                                                                                                                                                                   |
| Produktbeschreibung      | Control Peptide for N0536-09 (antiserum) and N0536-10 (affinity purified) A 19-aa peptide sequence within the cytoplasmic, N-terminus of rat NBC1. Bicarbonate, along with CO <sub>2</sub> , is the major pH buffer of biological fluids. A great majority of HCO <sub>3</sub> - rea... |
| Reinheit                 | Highly purified                                                                                                                                                                                                                                                                         |
| Formulierung             | Supplied as a liquid in PBS, pH 7.2, 0.09% sodium azide before the addition of glycerol to 40%                                                                                                                                                                                          |
