| Alternativnummer         | USB-O5999-19-50                                                                                                                                                                                                                                               |
| Hersteller               | US Biological                                                                                                                                                                                                                                                 |
| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                             |
| Produktbeschreibung      | Single-stranded oligonucleotide, chemically synthesized, suitable for DNA synthesis applications. Special Labels: Biotin, Fluorescein, and Phosphate modifications can be included at the 5 or 3 site. For special labels add -B, -F, -P and -5, -3 to the... |
| Reinheit                 | Purified by HPSF method. Quality Control: MALDI-TOF MS.                                                                                                                                                                                                       |
| Formulierung             | Supplied as a salt-free lyophilized powder.                                                                                                                                                                                                                   |
