| Hersteller               | US Biological                                                                                                                                                                                                                                                 |
| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                             |
| Produktbeschreibung      | Single-stranded oligonucleotide, chemically synthesized, suitable for DNA applications. Special Labels: Biotin, Fluorescein, and Phosphate modifications can be included at the 5 or 3 site. For special labels add -B, -F, -P and -5, -3 to the catalog n... |
| Reinheit                 | Purified using a desalting procedure. Quality Control: MALDI-TOF.                                                                                                                                                                                             |
| Formulierung             | Supplied as a salt-free lyophilized powder. Reconstitute with sterile dH <sub>2</sub> O, TE or Tris buffer, pH 7.0.                                                                                                                                           |
