| Hersteller               | US Biological                                                                                                                                                                                                                                                 |
| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                             |
| Applikation              | ELISA, IHC, WB                                                                                                                                                                                                                                                |
| Produktbeschreibung      | Pisum sativum agglutinin is nearly identical in structure and carbohydrate specificity to Lens culinaris agglutinin. PSA has four subunits, two of approximately 17,000D and two of about 6,000D. Isoelectric focusing has revealed two isolectins with is... |
| Formulierung             | Supplied as a liquid in 10mM HEPES, pH 7.5, 0.15M sodium chloride, 0.1mM Ca++, 0.01mM Mn++, 0.08% sodium azide. Labeled with Biotin.                                                                                                                          |
