| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                             |
| Produktbeschreibung      | Heparin Beads are made by coupling 20-35kD size Heparin extracted from Porcine intestinal mucosa (Type I) to Sepharose beads. These beads are useful for isolating heparin-binding protein such as Antithrombin III, lipoproteins, various enzymes and DNA... |
| Formulierung             | Supplied as a liquid in PBS pH 7.4, 0.3N sodium chloride added with 0.01% thimerosal as a preservative.                                                                                                                                                       |
