| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                             |
| Produktbeschreibung      | Peptide is used to block TCF1 (C63D9) Rabbit mAb reactivity in immunohistochemistry protocols. LEF1 and TCF are members of the high mobility group (HMG) DNA binding protein family of transcription factors which consists of the following: Lymphoid enh... |
| Reinheit                 | Highly Purified                                                                                                                                                                                                                                               |
| Formulierung             | Supplied as a liquid in 20 mM potassium phosphate (pH 7.0), 50 mM NaCl, 0.1 mM EDTA, 1 mg/ml BSA and 5% glycerol.                                                                                                                                             |
