| Applikation              | ELISA, WB                                                                                                                                                                                                                                                     |
| Immunogen                | Recombinant human Tissue Factor                                                                                                                                                                                                                               |
| Produktbeschreibung      | Tissue Factor (TF) is expressed in the plasma membranes of many cell types. It is an integral membrane glycoprotein consisting of a single chain molecule of 44kD. TF consists of an extracellular domain (residues 1-219), a transmembrane domain (residu... |
| Reinheit                 | Purified by DEAE chromatography.                                                                                                                                                                                                                              |
| Formulierung             | Supplied as a liquid in 50% glycerol.                                                                                                                                                                                                                         |
