## Product Datasheet

### **Transforming Growth Factor beta Induced (BIGH3, TGFBI, Beta-ig-h3), Clone: [11C1085D31B8], Rabbit, Monoclonal USB-T8252-91H**

|                          |                                                                                                                                                                                                                                                               |

| Hersteller               | US Biological                                                                                                                                                                                                                                                 |
| Wirt                     | Rabbit                                                                                                                                                                                                                                                        |
| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | IF, IP, WB                                                                                                                                                                                                                                                    |
| Immunogen                | Synthetic peptide corresponding to residues near the C-terminus of human BIG-H3.                                                                                                                                                                              |
| Produktbeschreibung      | BIG-H3 (TGFBI/RGD-CAP/Kerato-epithelin) is a 683aa secretory protein induced by TGF-B that plays a role in cell adhesion, differentiation, and apoptosis (1-4). BIG-H3 contains an internal cysteine-rich EMI domain followed by four fasciclin-1 domains ... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [11C1085D31B8]                                                                                                                                                                                                                                                |
| UniProt                  | <a href="#">Q15582</a>                                                                                                                                                                                                                                        |
| Reinheit                 | Purified                                                                                                                                                                                                                                                      |

|              |                                                                                                                               |
|--------------|-------------------------------------------------------------------------------------------------------------------------------|
| Formulierung | Supplied as a liquid in 10mM sodium HEPES, pH 7.5, 150mM sodium chloride, 0.1mg/ml BSA, &lt;0.02% sodium azide, 50% glycerol. |
