## Product Datasheet

### **ZNF213 (Zinc Finger Protein 213, CR53, Putative Transcription Factor CR53, Zinc Finger Protein with KRAB and SCAN Domains 21, ZKSCAN21, ZSCAN53) (Azide Free), IgG1, Clone: [5D7], Mouse, Monoclonal USB-Z0741-13**

|                          |                                                                                                                                                                                                                                                               |

| Alternativnummer         | USB-Z0741-13-100                                                                                                                                                                                                                                              |
| Hersteller               | US Biological                                                                                                                                                                                                                                                 |
| Wirt                     | Mouse                                                                                                                                                                                                                                                         |
| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | ELISA, IHC, WB                                                                                                                                                                                                                                                |
| Immunogen                | Recombinant human protein corresponding to a portion of amino acids within aa133-243 of human ZNF213.                                                                                                                                                         |
| Produktbeschreibung      | C2H2 zinc finger proteins, such as ZNF213, have bipartite structures in which one domain binds DNA or RNA and the other modulates target gene expression.[supplied by OMIM] Applications: Suitable for use in ELISA, Immunohistochemistry (paraffin), and ... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [5D7]                                                                                                                                                                                                                                                         |
| Isotyp                   | IgG1                                                                                                                                                                                                                                                          |

|              |                                                                          |
|--------------|--------------------------------------------------------------------------|
| NCBI         | <a href="#">004211</a>                                                   |
| Reinheit     | Purified by immunoaffinity chromatography.                               |
| Formulierung | Supplied as a liquid in PBS, pH 7.2. No preservative added (Azide free). |
