Product Datasheet

Human Tissue-type Plasminogen Activator (tPA) ELISA Kit BYT-ORB1807163

Artikelname	Human Tissue-type Plasminogen Activator (tPA) ELISA Kit
Artikelnummer	BYT-ORB1807163
Hersteller Artikelnummer	orb1807163
Alternativnummer	BYT-ORB1807163-48,BYT-ORB1807163-96
Hersteller	Biorbyt
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Produktbeschreibung	Human Tissue-type Plasminogen Activator (tPA) ELISA Kit...
Detektionsbereich	0.63-40ng/mL
Sensitivitaet	0.056 ng/mL
UniProt	P00750
Proben	serum, plasma, Tissue homogenate and Other biological samples
Target-Kategorie	tPA

Anwendungsbeschreibung

Application Notes: This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Human tPA. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Human tPA and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Human tPA, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm. The OD value is proportional to the concentration of Human tPA. You can calculate the concentration of Human tPA in the samples by comparing the OD of the samples to the standard curve
