Product Datasheet

Human Fetal Fibronectin (fFN) ELISA Kit BYT-ORB1947256

Artikelname	Human Fetal Fibronectin (fFN) ELISA Kit
Artikelnummer	BYT-ORB1947256
Hersteller Artikelnummer	orb1947256
Alternativnummer	BYT-ORB1947256-48,BYT-ORB1947256-96
Hersteller	Biorbyt
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Produktbeschreibung	Human Fetal Fibronectin (fFN) ELISA Kit...
Detektionsbereich	15.63-1000ng/mL
Sensitivitaet	9.38 ng/mL
UniProt	P02751
Proben	serum, plasma, Tissue homogenate and Other biological samples
Target-Kategorie	fFN

Anwendungsbeschreibung

Application Notes: This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Human fFN. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Human fFN and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Human fFN, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm. The OD value is proportional to the concentration of Human fFN. You can calculate the concentration of Human fFN in the samples by comparing the OD of the samples to the standard curve
