### Human Presenilin 1 (PS1) ELISA Kit BYT-ORB1947284

|                          |   |
|--------------------------|---|
| Artikelname              | Human Presenilin 1 (PS1) ELISA Kit                            |
| Artikelnummer            | BYT-ORB1947284  |
| Hersteller Artikelnummer | orb1947284  |
| Alternativnummer         | BYT-ORB1947284-48,BYT-ORB1947284-96                           |
| Hersteller               | Biorbyt   |
| Kategorie                | Kits/Assays   |
| Spezies Reaktivität      | Human   |
| Produktbeschreibung      | Human Presenilin 1 (PS1) ELISA Kit...                         |
| Detektionsbereich        | 0.32-20ng/mL  |
| Sensitivitaet            | 0.19 ng/mL  |
| UniProt                  | <a href="#">P49768</a>  |
| Proben                   | serum, plasma, Tissue homogenate and Other biological samples |
| Target-Kategorie         | PS1   |

Anwendungsbeschreibung

Application Notes: This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Human PS1. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Human PS1 and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Human PS1, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm. The OD value is proportional to the concentration of Human PS1. You can calculate the concentration of Human PS1 in the samples by comparing the OD of the samples to the standard curve
