Product Datasheet

Rat Pulmonary surfactant-associated protein A1 (SP-A1) ELISA Kit BYT-ORB1947432

Artikelname	Rat Pulmonary surfactant-associated protein A1 (SP-A1) ELISA Kit
Artikelnummer	BYT-ORB1947432
Hersteller Artikelnummer	orb1947432
Alternativnummer	BYT-ORB1947432-48,BYT-ORB1947432-96
Hersteller	Biorbyt
Kategorie	Kits/Assays
Spezies Reaktivität	Rat
Produktbeschreibung	Rat Pulmonary surfactant-associated protein A1 (SP-A1) ELISA Kit...
Detektionsbereich	31.25-2000pg/mL
Sensitivitaet	18.75 pg/mL
Proben	serum, Tissue homogenate, Cell lysate, Cell culture supernatant, Alveolar lavage fluid
Target-Kategorie	SP-A1

Anwendungsbeschreibung

Application Notes: This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Rat SP-A1. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Rat SP-A1 and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Rat SP-A1, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm. The OD value is proportional to the concentration of Rat SP-A1. You can calculate the concentration of Rat SP-A1 in the samples by comparing the OD of the samples to the standard curve
