Human Reversion-inducing-cysteine-rich protein with kazal motifs (RECK) ELISA Kit BYT-ORB1947961

Artikelname	Human Reversion-inducing-cysteine-rich protein with kazal motifs (RECK) ELISA Kit
Artikelnummer	BYT-ORB1947961
Hersteller Artikelnummer	orb1947961
Alternativnummer	BYT-ORB1947961-48,BYT-ORB1947961-96
Hersteller	Biorbyt
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Produktbeschreibung	Human Reversion-inducing-cysteine-rich protein with kazal motifs (RECK) ELISA Kit...
Detektionsbereich	0.63-40ng/mL
Sensitivitaet	0.38 ng/mL
UniProt	O95980
Proben	Tissue homogenate and Cell lysate
Target-Kategorie	RECK

Anwendungsbeschreibung

Application Notes: This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Human RECK. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Human RECK and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Human RECK, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm. The OD value is proportional to the concentration of Human RECK. You can calculate the concentration of Human RECK in the samples by comparing the OD of the samples to the standard curve
