Product Datasheet

Human Growth Hormone Receptor (GHR) ELISA Kit BYT-ORB1948362

Artikelname	Human Growth Hormone Receptor (GHR) ELISA Kit
Artikelnummer	BYT-ORB1948362
Hersteller Artikelnummer	orb1948362
Alternativnummer	BYT-ORB1948362-48,BYT-ORB1948362-96
Hersteller	Biorbyt
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Produktbeschreibung	Human Growth Hormone Receptor (GHR) ELISA Kit...
Detektionsbereich	1.57-100ng/mL
Sensitivitaet	0.94 ng/mL
UniProt	P10912
Proben	Tissue homogenate and Cell lysate
Target-Kategorie	GHR

Anwendungsbeschreibung

Application Notes: This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Human GHR. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Human GHR and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Human GHR, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm. The OD value is proportional to the concentration of Human GHR. You can calculate the concentration of Human GHR in the samples by comparing the OD of the samples to the standard curve
