Reinheit	Recombinant protein mutant corresponds to amino acids 1 to 480 of mature human AKT1, Akt isoform 1. There are two point mutation of key activating residues, T308A and S473A. The recombinant protein contains a polyhistidine affinity tag at the amino terminus. Purity is greater than 90% as determined by reducing and non-reducing SDS-PAGE and by analytical HPLC.
Formulierung	Liquid
Application Verdünnung	WB: 50ng
Anwendungsbeschreibung	Modification: Phosphorylated. Biological Origin: Human. Application Notes: Human AKT1 mutant recombinant protein has been tested in SDS-Page and western blot and is suitable as a control protein for immunoassays using antibodies targeting the T308 or S473 key phosphorylation sites. For western blot use at 50 ng or less. For other assays concentration is user optimized
