Anwendungsbeschreibung

Solubility: It is recommended to reconstitute the lyophilized TACI in sterile 18MO-cm H₂O not less than 100µg/ml, which can then be further diluted to other aqueous solutions. Biological Activity: Fully biologically active when compared to standard. The biological activity is determined by its ability to block human BAFF induced T2B cell survival using a concentration range of 1.0-3.0 µg/ml corresponding to a specific activity of 334-1000 IU/mg. Application Notes: Cytokines And Growth Factors
