### Recombinant Puccinia triticina Secreted protein (PTTG\_03405) BYT-ORB1095929

|                          |  |
|--------------------------|--|
| Artikelname              | Recombinant Puccinia triticina Secreted protein (PTTG_03405)   |
| Artikelnummer            | BYT-ORB1095929   |
| Hersteller Artikelnummer | orb1095929   |
| Alternativnummer         | BYT-ORB1095929-20,BYT-ORB1095929-100,BYT-ORB1095929-1  |
| Hersteller               | Biorbyt  |
| Kategorie                | Proteine/Peptide   |
| Produktbeschreibung      | This Recombinant Puccinia triticina Uncharacterized protein (PTTG_03405) spans the amino acid sequence from region 19-189aa. Purity: Greater than 90% as determined by SDS-PAGE....  |
| Molekulargewicht         | 18.7 kDa   |
| UniProt                  | <a href="#">A0A180GV39</a>   |
| Puffer                   | If the delivery form is liquid, the default storage buffer is Tris/PBS-based buffer, 5%-50% glycerol. If the delivery form is lyophilized powder, the buffer before lyophilization is Tris/PBS-based buffer, 6% Trehalose, pH 8.0. |
| Quelle                   | Puccinia triticina (isolate 1-1 / race 1 (BBBD)) (Brown leaf rust fungus)  |
| Reinheit                 | Greater than 90% as determined by SDS-PAGE.  |
| Formulierung             | Liquid or Lyophilized powder   |

|                        |   |

| Anwendungsbeschreibung | Biological Origin: Puccinia triticina (isolate 1-1 / race 1 (BBBD))<br>(Brown leaf rust fungus). Application Notes: We recommend that this<br>vial be briefly centrifuged prior to opening to bring the contents to<br>the bottom. Please reconstitute protein in deionized sterile water to<br>a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of<br>glycerol (final concentration) and aliquot for long-term storage at -<br>20°C/-80°C. Our default final concentration of glycerol is 50%.<br>Customers could use it as reference |
