| Wirt                     | Mouse                                                                                                                                                                                                                                                         |
| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | ELISA, WB                                                                                                                                                                                                                                                     |
| Immunogen                | Full length recombinant SARS-CoV-2 nucleocapsid Protein was used as the immunogen for this antibody.                                                                                                                                                          |
| Produktbeschreibung      | The structural nucleocapsid (N) protein of nCoV/SARS-CoV-2/COVID-19 is a predicted 46 kDa phosphoprotein having 419 amino acid residues. A short Serine rich stretch and a recognized nuclear localization signal are the unique features of the nucleocap... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
