| Applikation              | FACS                                                                                                                                                                                                                                                          |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | Human PBMCs were used as immunogen for the CD3 antibody.                                                                                                                                                                                                      |
| Konjugation              | FITC                                                                                                                                                                                                                                                          |
| Produktbeschreibung      | CD3D is one of the several invariant chains that the variable chains of TCR: Alpha beta or Gamma delta TCR contains, and which support surface TCR expression and transduce the TCR signal. CD3D, along with four other CD3 subunits, binds either TCR alp... |
