| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | FACS, WB                                                                                                                                                                                                                                                      |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | A partial length recombinant IL-36R protein (amino acids 1-203) was used as the immunogen for this antibody.                                                                                                                                                  |
| Produktbeschreibung      | IL-36R is a member of the IL-1 receptor family that has been associated with various inflammation-associated diseases. Ligands binding to IL-36R subsequently recruit the IL-1RAcP (IL-1 Receptor Accessory Protein) forming a heterodimeric signaling com... |
