| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | FACS, IHC, WB                                                                                                                                                                                                                                                 |
| Spezies Reaktivität      | Human, Mouse                                                                                                                                                                                                                                                  |
| Immunogen                | A partial length recombinant Ikke protein (amino acids 2-203) was used as the immunogen for this antibody.                                                                                                                                                    |
| Produktbeschreibung      | Ikke is a member of the IKK (IKappaB kinase) family that has been identified as an oncogenic protein and found to be up-regulated in breast cancer, ovarian cancer and prostate cancer. The Ikke protein has 33% and 31% identity at the amino acid level ... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [ABM13C7]                                                                                                                                                                                                                                                     |
