| Wirt                     | Mouse                                                                                                                                                                                                                                                         |
| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | IHC, WB                                                                                                                                                                                                                                                       |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | A partial length recombinant AGR2 protein (amino acids 40-110) was used as the immunogen for this antibody.                                                                                                                                                   |
| Produktbeschreibung      | AGR2 (Anterior gradient protein 2 homolog) is a protein disulfide isomerase. It is required for MUC2 post-transcriptional synthesis and secretion. AGR2 plays a role in the production of mucus by intestinal cells. AGR2 proto-oncogene may play a role i... |
