## Product Datasheet

### **Phospho-ATF2 (Thr71) (Clone: G3) rabbit mAb PE conjugate, Clone: [ATF2T71-G3], Rabbit, Monoclonal ABI-12-4154**

|                          |                                                                                                                                                                                                                                                               |

| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | FACS                                                                                                                                                                                                                                                          |
| Spezies Reaktivität      | Human, Mouse                                                                                                                                                                                                                                                  |
| Immunogen                | A synthetic phospho-peptide corresponding to residues surrounding Thr71 of human phospho ATF2                                                                                                                                                                 |
| Konjugation              | PE                                                                                                                                                                                                                                                            |
| Produktbeschreibung      | Activating transcription factor 2 (ATF2), known as cyclic AMP (cAMP) response element (CRE) binding protein 2 (CREB2) and CRE-BP1 is a member of the activating protein-1 (AP1) transcription factor family. Through homo-dimerization or hetero-dimerizat... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [ATF2T71-G3]                                                                                                                                                                                                                                                  |

|                        |                                                                                                                                                                                                                                                                |
|------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Formulierung           | Conjugated                                                                                                                                                                                                                                                     |
| Application Verdünnung | For flow cytometric staining, the suggested use of this reagent is 5 $\mu\text{L}$ per million cells or 5 $\mu\text{L}$ per 100 $\mu\text{L}$ of staining volume. It is recommended that the reagent be titrated for optimal performance for each application. |
